Microgreens are young seedlings of edible vegetables and herbs. Unlike larger herbs and vegetables that take weeks or months to grow, microgreens can be harvested and eaten already after 7-14 days. We harvest our microgreens in our directly connected grow room at least once a day. Each microgreen variety has its own ensemble of health benefits. For more info, please don't hesitate to ask us or visit our homepage: houseofgreens.de

We would really appreciate it if you'd
leave us a Google review!
