+ cream cheese, avocado, hummus

*Microgreens: sunflower, radish*

Microgreens are young seedlings of edible  
vegetables and herbs. Unlike larger herbs and  
vegetables that take weeks or months to  
grow, microgreens can be harvested and  
eaten already after 7-14 days. We harvest our  
microgreens in our directly connected grow  
room at least once a day. Each microgreen  
variety has its own ensemble of health  
benefits. For more info, please  
don't hesitate to ask us or visit  
our homepage: [houseofgreens.de](http://houseofgreens.de)

We would really appreciate it if you'd  
leave us a Google review!
